Interested in polar exploration—stories, leadership, adventure?

I look at the subject from the point of view of a business school management professor who is interested not only in the history, but the management/strategic/entrepreneurship/leadership/human lessons embedded in these stories. Please feel free to use, but don't distribute without crediting the work I did to put it together. If you want to learn more or talk about issues in the materials, feel free to contact me—I love the subject.

Many items in the bibliography are annotated with brief personal notes and some publisher/seller descriptions. Need to add/revise with full listing of what I have, but it'll give you a sense of what's out there. Some of the sources in here are the basis for a research project I am working on about management lessons from polar exploration.

Bibliography sections:

- Books on Polar Exploration—Explorers, Adventurers, Whalers, Sealers
- Documentaries and Movies/Videos List
- A few related but non-polar shipwreck/survival books

Books on Polar Exploration—Explorers, Adventurers, Whalers, Sealers

- ✓ Aas, Steinar. 2002. <u>Tragedien Umberto Nobile</u>. Oslo: Det Norske Samlaget.
- ✓ Adams, Harry. 1932. <u>Beyond the Barrier with Byrd: An Authentic Story of the Byrd Antarctic Exploring Expedition</u>. Chicago: M. A. Donohue.

This account is by the expedition's Chief Officer and Navigator, U. S. Navy Lieutenant Harry Adams. Byrd is an ass.

✓ Albanov, Valerian In the Land of White Death

Albanov's memoir re St. Anna disaster in Siberian Arctic. Latest edition solves major mystery. Contains excerpts from the newly discovered diary of Alexander Konrad (the other survivor), and shows he was one of the thieves/deserters Albanov mentions but does not name! Plus, the logbook from the St. Anna inspired and was fictionalized in Veniamin Kaverin's <u>Two Captains</u>! [Julia rec'd Kaverin, told her I found the connection to Albanov]

- ✓ Alexander, Caroline <u>The Endurance: Shackleton's Legendary Antarctic Expedition</u>
- ✓ Alexander, Caroline. 1999 2nd ed. <u>Ms. Chippy's Last Expedition: The Remarkable Journal of Shackleton's Polar-bound Cat</u>. New York: HarperCollins.
 Humorous fictionalized diary of Chippy MacNeish's cat.
- ✓ Allen, Everett. 1973 1st ed. <u>Children of the Light: The Rise and Fall of New Bedford Whaling and</u> the Death of the Arctic Fleet. Boston: Little, Brown and Co.

Ebay: History of whaling and ship-handling and detailed account of the disaster that befell the New Bedford fleet off Alaska's Point Barrow in the late 1860s.

Alibris: "We have for the last 15 days been satisfied there is not the slightest possibility of saving our ships or their property ... we number some 1200 souls, with not more than 3 months' provisions & fuel; no clothes suitable for winter wear." It was a disaster without parallel in the history of whaling. 32 New Bedford ships lay trapped in the gale-driven pack ice off Alaska's Point Barrow. This is the story of this catastrophe & of the incredible rescue of the shipwrecked victims.

Amundsen, Roald. 1908. <u>The North West Passage: Being the Record of a Voyage of Exploration of the Ship "Gjoa" 1903-1907 in Two Volumes</u>. London: Archibald Constable and Co.

✓ Amundsen, Roald <u>The South Pole</u>—have paperback

Amundsen, Roald. 1912 (1st English ed.) <u>The South Pole: An Account of the Norwegian Antarctic Expedition in the 'Fram', 1910-1912</u>. Trans from the Norwegian by A. G. Chater. London: John Murray.

Ebay: Unlike Scott's party, which favored men and ponies over dogs, Amundsen took many dogs and few men so that the former could, in an emergency, serve as food for the latter. With weather conditions in their favor, Amundsen's party reached the pole just ahead of Scott's. The expedition was well organized and set off from the Bay of Whales using dog sleds and supply depots and reached the pole in 99 days, a distance of 1860 miles. Unlike Scott's party, all in the Amundsen group remained in good health and accomplished the great and perhaps last "extraordinary" polar journey. 2 volumes, 3 folding maps, folding plan, 130 photographic illustrations on 103 plates.

Amundsen, Roald. 1927. My Life as an Explorer. Garden City, N.Y.: Doubleday, Doran.

Arthur, Elizabeth. 1995. Antarctic Navigation: A Novel. New York: Knopf

Amazon: This story of an expedition to the South Pole, led by a young, ardent, complicated American woman, is a novel whose authenticity, storytelling force, and metaphorical richness immerses readers in the world of Antarctic exploration. It illuminates both the meaning of the century now ending and the power of the human spirit to navigate the new and the unknown. 4 maps.

Astrup, Eivind. 1898. With Peary Near the Pole. London: C. Arthur Pearson.

Bain, J. Arthur. 1897. Life and Explorations of Fridtjof Nansen. London: Walter Scott.

✓ Bainbridge, Beryl. 1994. <u>The Birthday Boys</u>. Carroll and Graf Paperback edition of fictionalized account of Scott's last expedition.

Ballantyne, Robert Michael. 1869 1st ed. <u>The World of Ice, Or the Whaling Cruise of "The Dolphin"</u> <u>and the Adventures of Her Crew in the Polar Regions</u>. London: T. Nelson and Sons. Alibris: Not a moment too soon! The fire had reached the place where the gunpowder was kept and, although there was not a great quantity of it, there was enough, when it exploded, to burst open the deck. In a few moments the Dolphin was wrapped in flames from stem to stern. The waves swept in, and, while they extinguished the fire, they sank the blackened

hull, leaving the two crowded boats floating in darkness on the bosom of the ice-laden sea.

Ballantyne R has several interesting-looking fictional stories from 19th century

✓ Barrett, Andrea. 1998 1st ed. <u>Voyage of the Narwhal</u>. New York: Norton.

Fictionalized account of the 1855 Narwhal ship trip to look for Franklin. Alibris: Andrea Barrett's novel is about the 1845 expedition to the Arctic that ended in starvation and possibly cannibalism. A New York Times Notable Book for 1998.

✓ Bartlett, Robert <u>The Karluk's Last Voyage</u> memoir, shows Stephansson as self-interested coward. Murder in the tents. Bartlett's hike is amazing.

Bauer, Thomas. 2001. <u>Tourism in the Antarctic: Opportunities, Constraints, and Future Prospects</u>. Haworth Press.

✓ Baughmann, T. H. Before the Heroes Came: Antarctica in the 1890s. (has great refs, cites)

Beardsley, Martyn. 2002 1st Amer. ed. <u>Deadly Winter</u>. Annapolis: Naval Institute Press. Bio of John Franklin, captain of Erebus and Terror in Arctic.

Ebay: Though once acclaimed for his heroic exploits in the Arctic and knighted for his contributions to overland experience, Rear Admiral Sir John Franklin is best known today for his spectacular blunders. On the first expedition under his command (1819-21), half of his party died tragically (and one man even resorted to cannibalism)- primarily because Franklin could not bring himself to turn back towards safety when supplies ran low. On his last foray into the Arctic (1845-47), an attempt to navigate the final unknown stretch of the Northwest Passage, he and all 129 of his crew died after he tried to navigate an ice-clogged strait and his ship became trapped.

✓ Beattie, Owen & Geiger, John. 1992. <u>Frozen In Time</u>. New York: Greystone Books. Remnants of Franklin's expedition and Hall's search expedition. Graves are found and exhumed, showing lead poisoning.

\checkmark Bechervaise, John. 1995 1st ed. <u>Arctic and Antarctic. The Will and the Way of John Riddoch</u> <u>Rymill</u>. Bluntisham Books,

The biography of a 'major, yet little known explorer'. Rymill joined 'Gino' Watkins' 2 expeditions to Greenland, and the British Graham Land Expedition.

✓ Beeby, Dean. 1994. <u>In a Crystal Land: Canadian Explorers in Antarctica</u>. Toronto University Press.

✓ Behrendt, J. 1998. <u>Innocents on the Ice: A Memoir of Antarctic Expedition, 1957</u>. University Press of Colorado.

Behrendt was part of Ellsworth Station set-up under Finn Ronne, discusses Ronne's managerial problems, autocratic nature, dissent and problems in expedition which was supposed to be scientific with USN support but Ronne ran it the other way around with lack of respect for scientists. Intense conflicts in expedition.

Ebay: Foreword by the Duke of Edinburgh, Introduction by Lord Shackleton. "There are many excellent books on the Antarctic but this one by Professor Fogg and David Smith, is special. What is so impressive about this book is that, firstly, it contains David Smith's paintings, which truly are wonderful, evocative and accurate. Indeed, I once described David as 'the finest recorder of that continent this century.' His paintings are accompanied by Professor Fogg's highly sophisticated and intelligent text. There is in Professor Fogg's text the most vivid description of the Antarctic to match David Smith's illustrations, combined with an almost unique historical dimension: a careful blending of the past right back to a time when the continent was a myth. Form the early adventures to the scientists and explorers of modern times--including, of course, those great journeys by Scott, Shackleton and Amundsen--the text presents a balanced and informal account of our least-known continent."--from the foreword by Lord Shackleton. The book proceeds from the discovery of Antarctica through its exploration and continues through its hope for the future. In addition to Smith's paintings, the book is illustrated with historic photos, drawings, and detailed maps.

Fictional thriller.

Ebay: eSoviet and American forces slug it out over strategic materials in the frozen South, where a dormant volcano is waking up in a terrible mood. Harrison (Storming Intrepid, 1989) shrewdly leaves the desert fighting to the real armies, taking his fighting forces to Antarctica, where a joint Soviet-American scientific project has dug up core samples rich in rubidium--an element essential to America's hypersecret new strategic defense gadget, an invisible shield that evaporates incoming missiles. Of course, no hypersecret is safe these days. The Soviets know all about the space shield, and they know that if the Americans get control of the rubidium, it is the last nail in the coffin of the Evil Empire. Cold war gets new life then as the Russians launch a sudden, fast, multiforce attack on the scientific study base in Antarctica, where the Americans are digging as fast as they can to reach the mother lode of rubidium. The Russians catch everybody except pretty volcano-scientist and former nurse Dana Harrow, who is off checking her seismographs. America doesn't take this lying down, of

course, Despite the world's stupidest president, the US puts together its own multiforce counterattack, and Ms. Harrow becomes the core of the resistance movement when she teams up with a squad of sharpshooting, snow-suited, ski- borne American paratroopers. Armies, navies, and air forces collide, and everybody gets very, very cold. Living, breathing humans and fresh scenery make this a better-than-average technobattle.

Amazon.com—If this story of espionage and survival were a novel, readers might dismiss the Shackleton-like exploits of its hero as too fantastic to be taken seriously. But respected historian David Howarth confirmed the details of Jan Baalsrud's riveting tale. It begins in the spring of 1943, with Norway occupied by the Nazis and the Allies desperate to open the northern sea lanes to Russia. Baalsrud and three compatriots plan to smuggle themselves into their homeland by boat, spend the summer recruiting and training resistance fighters, and launch a surprise attack on a German air base. But he's betrayed

shortly after landfall, and a quick fight leaves Baalsrud alone and trapped on a freezing island above the Arctic Circle. He's poorly clothed (one foot is entirely bare), has a head start of only a few hundred yards on his Nazi pursuers, and leaves a trail of blood as he crosses the snow. How he avoids capture and ultimately escapes--revealing that much spoils nothing in this white-knuckle narrative--is astonishing stuff. Baalsrud's feats make the travails in Jon Krakauer's Mt. Everest classic Into Thin Air look like child's play. In an introduction, Stephen Ambrose calls We Die Alone a rare reading experience: "a book that I absolutely cannot put down until I've finished it and one that I can never forget." This amazing book will disappoint no one. --John J. Miller

"[They] set out to make a thourough scientific exploration of the newly discovered Franz Josef Land, only some parts of its southern shores then being known, and the hope being reasonably entertained that it might extend far to the northward, and therefore afford facilities for a nearer approach to the North Pole." This book is important as an early exploration of an area that is still difficult to reach even today. More importantly, it was the Jackson-Harmsworth Expedition that assisted Fridtjof Nansen and Hjalmar Johansen as they returned from their attempt at reaching the North Pole. They had left the Fram and unassisted made their very daring attempt over the Arctic Ocean. The account of Nansen and Jackson is very remarkable. The Jackson - Harmsworth expedition had horrendous weather conditions, isolation and a multitude of polar bears to contend with. Great adventure reading. Armitage, who was second in command with Captain Scott's Discovery Expedition in the Antarctic, was a member of this expedition.

Enduring great hardships, Kane and his men achieved a Farthest North, laid the foundations for future Arctic scientific study, and discovered Kennedy Channel, which was to be the route for Hall, Greeley and Peary in years to come. Nine men objected to spending a second winter and obtained permission to return home. When they failed and returned to the ship as broken men, Kane nursed them back to health. He then determined to abandon the ice-bound ship and escaped to Upernivik after an 83-day trek which stands in the annals of Arctic exploration as archetype of victory in defeat. Kane died at age thirty-seven in 1857, having told his publisher, "The book, poor as it is, has been my coffin."

Moss accompanied the North Polar expedition led by Nares, which was sent out for the attainment of the North Pole in 1875. The ships, H.M.S.S. Alert, Discovery and Valorous, left England on 29 May 1875, crossed the Atlantic to Davis Straits and entered the Arctic regions. The latter vessel accompanied the expedition as far as Disco, for the purpose of helping it so far northwards with its heavy stock of three years' provisions and fuel. The expedition provided a wealth of information on Greenland's northwest coast. On extensive sledge journeys, the record northern latitude of 83 20'26" N was reached. What makes this book particularly interesting are the large and beautiful chromolithographs which show Godhavn Harbour, a musk ox hunt, the Alert in winter quarters, sledging parties, etc. 16 fine chromolithographic color plates, 1 map and 28 wood engravings in text

Ebay/Amazon: Murphy, when a young naturalist (Amer. Museum. Natural Hist.), shipped at Barbados on an old-time New Bedford whaler, sailing to South Georgia, an island of blizzards and glaciers, of sea elephants, penguins and albatrosses, and the pioneer land base of Antarctic whaling. This book is the journal into which he poured his thoughts and emotions in order that his bride, whom he had left behind, might ultimately share them. This is a tale of life, and of a team of many interdependent lives, in the crowded quarters of one of the last of the Yankee square-rigged blubber-hunters. The hazardous business of sperm whaling in the ancient manner is recounted with authenticity. Primarily a biologist, Murphy welcomed with all the enthusiams of youth the adventures that came aplenty. This is a whaling story, a mirror of stirring natural phenomena, a sea yarn which never (except whimsically) diverges from truth, a love story, and an unconscious self-portrait of a very pleasant and civilized person.

Of all the expeditions of this period, this swedish one produced perhaps the most important scientific results, providing geological connection between the southern tip of South America and the northern most extreme of Graham Land! The English edition appeared a year later.

Nordenskjöld, O. 1905 (1st English ed). <u>Antarctica, or Two Years Amongst the Ice of the South Pole</u>. London: Hurst & Blackett.

Ebay/Amazon: "One of the rarest accounts in English of a major exploration" (Renard 1149). "The principal account of the Swedish South Polar Expedition of 1901-04..., Nordenskjold's was the first journey to winter over in the Antarctic peninsula" (Taurus 33). "The scientific results of this expedition were greater than those of any other preceding expedition... a novelist would blush to rely on so many serendipitous encounters to reunite and rescue the party" (Spence 860. Conrad 1303). A classic voyage, the narrative of the Swedish South Polar Expedition, 1901-1904, published the same year as Scott's 'Voyage of the Discovery. The expedition wintered at Snow Hill Island on the east side of the Antarctic Peninsula. The expedition ship Antarctic, operating independently, was crushed in the ice and the crew wintered at Paulet Island. Nordenskjold was also the first to sail the North East Passage Also reprinted in 1977, Hamden, Conn: Archon.

Fictional thriller

Ebay: On a desolate island off the southern coast of Chile, an incredible discovery is made; a gigantic meteorite, the largest ever found, enbombed in the earth for millions of years. Half a world away, billionaire entrepreneur Palmer Lloyd decides he must have it as the centerpiece of his grandiose new museum. He is willing to pay any price, in dollars and in lives. Getting it back to New York poses a particular challenge: It will be the heaviest object ever moved by humankind. Fueled by Lloyd's money, an audacious expedition takes shape. Disguising a state-of-the-art ship as a rusted freighter, the expedition secretly heads southward with a fail-safe plan to steal the meteorite from Chile. Leading the group is an inscrutable engineer hired by Lloyd, and a world-famous meteorite hunter whose career was shattered by a controversial theory. Soon, along the icy rim of Antarctica, in the grip of a frozen hell, the adventurers are confronted with a terrifying

enigma about the origin and nature of the meteorite. It is a mystery they must solve, if they are to escape with their very lives.

✓ Facsimile edition issued in 1974 with a foreword by Vivian Fuchs, London: C. Hurst and Co., Toronto: McClelland and Stuart.

Ebay/Amazon: "gripping" illustrated account of Scott's Northern Party. Priestley (1886-1974) read geology for two years at Bristol University College before joining the 1907-1909 British Antarctic expedition led by Sir Ernest Shackleton. He contributed geological sections to Shackleton's THE HEART OF THE ANTARCTIC (1909). He later joined Scott's ill-fated second expedition, out of which he published (in 1914) this volume, an account of the two winters (1911 and 1912) he, and his scientific team, spent in the Antarctic environment.

"Another account of Scott's Terra Nova expedition, but here one reads about the wild adventures and amazing survival of the so-called Northern Party - an episode which may in our time achieve greater popularity than the dour tragedy of Scott's polar march. A letter from Priestley survives in which he says that many copies of this first printing were destroyed in a warehouse fire" (Taurus Collection:80). Preistley joined the northern party under Victor Campbell and spent 1911 at Cape Adare, before being landed 200 miles further south with provisions for eight weeks to carry out some summer fieldwork. However, they were forced to winter over when the Terra Nova failed to pick them up. Equipped for only summer weather, the party hunted seals to survive, wintering in a cave they dug into a snowdrift. Campbell eventually led the party back over 230 miles of sea ice to Cape Evans. Crean was clearly the sort wanted in a dangerous, uncertain venture: a loyal man of selfless courage, whose warmth and humor kept despair at bay in the life-and-death situations that arose in extreme environment of the Antarctic. Although facing unimaginable peril, he sang throughout the seventeen-day crossing of the Southern Ocean in a twenty-two-foot whaleboat with Shackleton. In what is arguably the greatest feat of individual heroism in the history of polar exploration, Crean trekked across thirty-five miles of snow and ice to reach rescue for his comrade, Teddy Evans, who was incapacitated by scurvy. Tom Crean's epic story spans the entire Heroic Age of Polar Exploration. He spent more time on the ice than either the more celebrated Scott or Shackleton and.

They had made the first coast to coast crossing of the continent unsupported by men, animals or machines and were too weak to continue over the floating Ross ice-shelf to open water. They had begun ninety-five days earlier by pulling nearly 500lbs each of essential food and fuel on sledges and on the way endured windchill temperatures as low as minus 85 degrees Celsius. Mike Stroud's account of their 1,350 mile traverse at the south pole is as moving as it is surprising, for this territory is also the no-man's land where mind and body interact, and psychological as well as physical stress provide a greater challenge than the landscape and the weather.

Criterion's DVD is restored, tinted per original

Ebay: This is the story of life and love in the Arctic. Robert J. Flaherty, who wrote, directed, produced, shot, and edited this landmark picture, will forever be remembered as the godfather of documentary filmmaking. This landmark production, shot on the northeastern shore of Hudson Bay, remains the first great nonfiction film. With the help of Nanook and his friends and family, Flaherty undertook the mission of documenting an Eskimo culture that today no longer exists - that went the way of the dinosaurs since this film was shot. Nanook ice fishes, harpoons a walrus, catches a seal, traps, builds an igloo, and trades pelts at a trading post, all captured by Flaherty's inquisitive camera.

Voices from the Ice: One Arctic Summer

Ebay: Running time: 45 minutes. In this award-winning wildlife film, you'll view life on the Alaska tundra as it thrives during the brief passage of one Arctic summer. Through his narrative and cinematography, Dale Johnson reveals a sensitive portrayal of the many plants and animals that abound in this seemingly barren wasteland--from the migrating caribou to the smallest life on the tundra surface. Marvel at the majestic glaciers sculpting Alaska...thrill to thunderous icefalls cascading into the sea...and wonder at the beauty of this rich land of wildlife, forests and wildflowers.

NOVA episode:

Join an extreme expedition to the top of Antarctica's highest peak--Vinson Massif. In this high-altitude adventure, Jon Krakauer, author of Into Thin Air, world-class mountaineer Conrad Anker, and their team of climbers, scientists, and filmmakers take a trailblazing expedition to the top of Antarctica's tallest peak, Vinson Massif. Along the way, their experiences are contrasted with those of Norwegian adventurer Roald Amundsen and British explorer Robert Falcon Scott who in 1911 raced to be first to reach the South Pole. Krakauer's insightful narration takes you to the driest and coldest continent on earth where the team embarks on an extreme mission to not only to summit Vinson by traversing the unclimbed east face, but also to determine its exact height and to take snow measurements that will help scientists study weather patterns. Join NOVA and battle 60-mile-an-hour winds and temperatures as low as 35 degrees below zero. Learn about the horrible fate that befell Scott and his team after reaching the South Pole one month after Amundsen. See spectacular panoramic footage that captures a rugged but beautiful place as far away from civilization as you can get and still be on earth. And experience the tension of a team pushed to its limits.

The Island at the Top of the World

1999 G-rated fictional movie

Ebay: In 1907, Professor John Ivarson (David Hartman), an American archaeologist, finds himself on a strange mission. He has been persuaded by Sir Anthony Ross (Donald Sinden), a wealthy Englishman, to undertake a search for his list son Donald. The youth disappeared in the Arctic wilderness leaving two clues: a page from an old Hudson Bay Company journal mentioning a hidden island far beyond land's end where the whales go to die, and a curious map of carved whalebone. The rescue party takes off in the Hyperion, a giant airship designed and piloted by Capt. Brieux (Jacques Marin) and is astonishingly carried off into a mysterious, time-forgotten Viking kingdom hidden beneath dense volcanic clouds. It is there where they encounter an adventure beyond imagination as they attempt to rescue Donald from The Island at the Top of the World.

Leslie, Edward. 1998. <u>Desperate Journeys, Abandoned Souls : True Stories of Castaways and Other</u> <u>Survivors</u>. New York: Houghton Mifflin.

Ebay/Amazon: With painstaking research, riveting detail and elegant prose, freelance writer Leslie here creates a keen psychological study as well as a paean to the courage, resourcefulness and perseverance of the human body and mind. This is a hefty chronicle of true stories, from the 1500s to the present day, about survivors of shipwrecks, maroonings and plane crashes, lost in every sort of climate and environment, struggling against animals, humanssavage and civilizedand the forces of nature. There is Peter Carder, who sailed in the 16th century with Drake, was castaway once and twice marooned, ingratiated himself with Brazilian cannibals and outwitted his Portuguese enemies. Leslie insightfully describes the real "Robinson Crusoe," Alexander Selkirk, a sailing master who quarreled with his captain and was stranded for four years on an island paradise off the coast of Chile in the early 1700s. The account of Marguerite de la Roque, a 16th century French woman who was betrayed as an adulterer by her adventurer cousin on an Atlantic voyage and then left to die, pregnant, on an island off the coast of Canada with her servant and her lover, is affecting. But for sheer thrills and inspiration, readers will be fascinated by the tale of the ill-planned and ill-fated Stefansson Polar expedition of 1913. Illustrated.

McKee, Alexander. 1975. Death Raft. New York: Scribner.

Later edition is retitled and has section on more modern examples/parallels. Later edition is <u>Wreck of</u> the Medusa: The Tragic Story of the Death Raft.

Ebay/Amazon: In July 1816, a year after Napoleon's defeat at Waterloo, a French ship bound for the colony of Senegal foundered off the West African coast. Aboard were some 400 men, women, and children, some aristocrats, some Republicans, and all at the mercy of an incompetent captain who, a tribunal later found, had alienated his battle-tested officers and favored a shockingly incompetent and untried navigator. That captain, writes Alexander McKee in this forceful work of historical reconstruction, did not wait to see the results of his incompetence; he abandoned his crew and set off on a longboat for the Senegalese shore. Other officers and crewmen left on the remaining lifeboats, taking most of the ship's provisions and leaving more than 150 passengers to brave the open sea on a raft. Within a few days, most of those castaways had been burned to death by the sun, providing food for the survivors. When rescuers arrived, they found only "fifteen men, almost naked, faces and bodies blotched and disfigured by the scorching sun"--a sight that would soon be reported to a horrified world. McKee writes not only of the fate of the Medusa and its unfortunate passengers, but also of other terrible shipwrecks and kindred incidents. Along the way, he looks at the making of Géricault's celebrated painting The Wreck of the Medusa, the effect of exposure and dehydration on the human body, and assorted questions of bravery and cowardice. His book makes for a vivid, highly readable--if sometimes repugnant--tale of disaster and terror. --Gregory McName

✓ Rawicz, Slavomir. <u>The Long Walk</u>. 1956. New York: Harper and Brothers. 1997 ed., Lyons Press has new author's afterword and original Polish edition foreword.

Ebay/Amazon:

Cavalry officer Slavomir Rawicz was captured by the Red Army in 1939 during the German-Soviet partition of Poland and was sent to the Siberian Gulag along with other captive Poles, Finns, Ukranians, Czechs, Greeks, and even a few English, French, and American unfortunates who had been caught up in the fighting. A year later, he and six comrades from various countries escaped from a labor camp in Yakutsk and made their way, on foot, thousands of miles south to British India, where Rawicz reenlisted in the Polish army and fought against the Germans. The Long Walk recounts that adventure, which is surely one of the most curious treks in history.

Reviewer: C. Beta from Freeview

There are classics and then there are _classics_. This memoir is in the second group, the kind of book that stands apart from those that would claim to be its peers by virtue of its singular vision. The opening pages are right out of Solzhenitsyn, in fact take place in the same prison that he almost lovingly calls the "Big Lubyanka" in The Gulag Archipeligo. But this is not Solzhenitsyn with his grace and humor and satire and righteous anger recollecting the soul-altering experiences that ironically made him into the great poet of the dismal 20th century. Instead, Rawicz is more of an Everyman, the ordinary Polish cavalry officer trapped without cause within the Soviet penal system. His is not the desire to write the history of the Soviet Union (something Solzhenitsyn eventually does indirectly with the Gulag), but rather the more basic impulse just to be free. Even if that means the travails of a year-long journey on foot through one hardship after another, freedom will not be denied him.

There are mysteries aplenty in this book. How can Rawicz recall the details and dialog that he does years after the fact? Who is the unnamed American who accompanies Rawicz and the others on the walk and what was he really doing in the Soviet Union? Why did Rawicz lose contact with all his boon companions after the war? The reader can be forgiven for suspecting that there are other things at work here below the text, that something was lost or altered in the transformation from memory to an English that he learned only later when living in England.

But still, this is a magnificent book. I've given numerous copies to friends and strangers. Walkers and hikers in particular should enjoy this story, for beneath the horrors of starvation and death there lies the secret joy of a truly open-ended walk, epic in length, outside and alive and free.
